## 1. INTRODUCTION

---

The aim of this document is to explain in detail what should be the steps for installing the *EA Extension for QA* software, to function properly.

Once the installation is completed, *EA Extension for QA* will be available for users of Enterprise Architect.

## 2. INSTALLATION

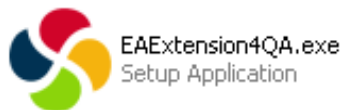

---

### 1. Hardware and Software requirements:

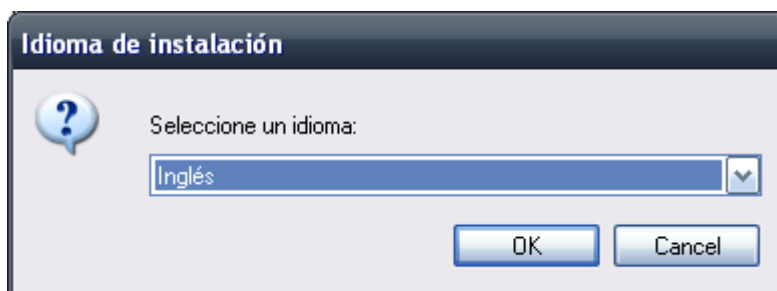

- Intel® Pentium III 450 Mhz class processor (or better).
- Microsoft® Windows Server 2003 (SP1); Windows Server 2008; Windows Vista (SP2); Windows XP; Windows 7.
- Microsoft .NET Framework 3.5 SP1
- RAM 96 MB (minimum); 256 MB (recommended)
- 5 MB Hard Disk space available.
- Enterprise Architect v7. 0 (or higher) installed

### 2. Installation steps:

1. Execute the program “EAExtension4QA.exe”:

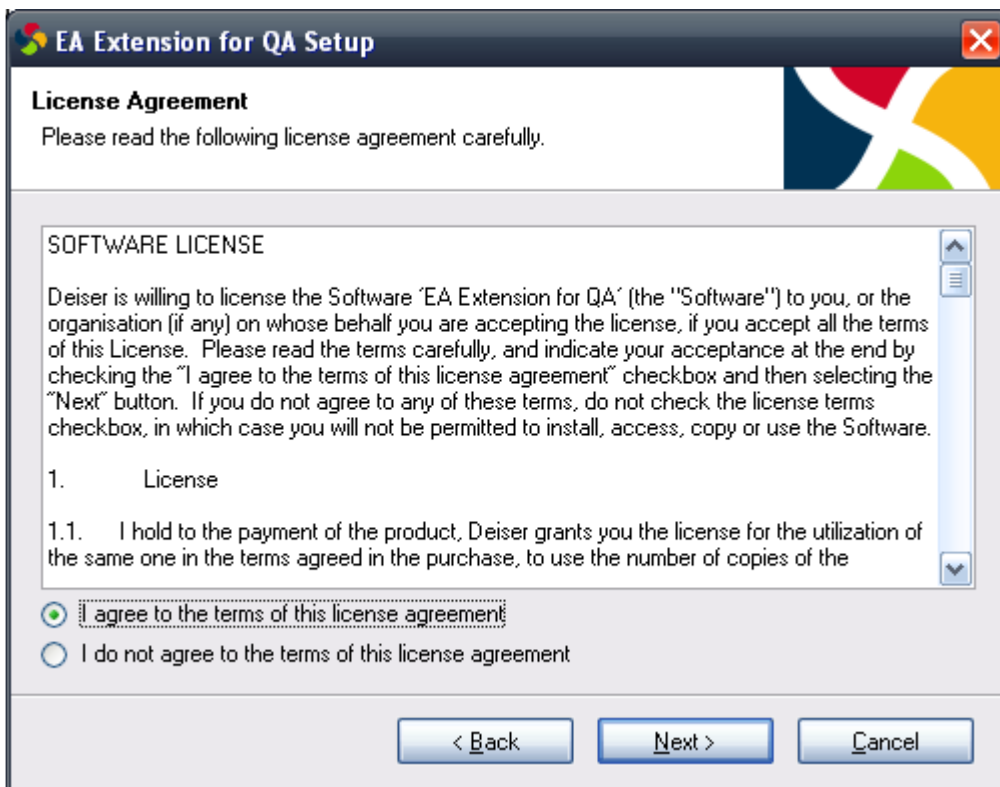

2. Select the language. This option applies to both, the installer program and the Add-In. However, the Add-In language can be changed later at any time:

3. In the Welcome screen, click “Next”:

4. In the License Agreement screen, after carefully reading the license agreement, select "I accept the terms of the license agreement" if necessary and click "Next":

5. In the Ready to Install screen, click “Next” to proceed to install the Add-In:

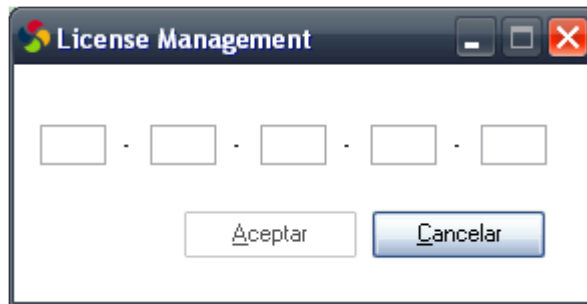

6. Once the installation is completed click “Finish”:

### 3. Steps to activate the license:

1. In order to activate the license, the first step is to open the Add-In Menu | EA Extension for QA | Add License Number
2. In the Activation screen insert the License Number and click “Enter”:

3. If the activation is successfully, the following message is displayed:

### 3. UNINSTALL

---

1. Go to “Start → All Programs” you may find an entry called “EA Connector for Jira” which contains a shortcut to the uninstall program:

2. When you run the uninstaller, the following screen is displayed, click “Next”:

3. Finally, in the “Uninstall Completed” screen, click “Finish”:

4. The EA module has been removed from the system.
